INNOVATIVE ULTRA LIGHTNESS

Aluminum alloy handle series - to be a global standard.

Since August 13, 1919

Nihon Kogu Product Co., Ltd., founded in Kobe City, Hyogo Prefecture, began manufacturing and selling shovels, scoops, and pickaxes under the brand name Tombo (dragonfly). Listed on the Osaka Stock Exchange in May 1949 and listed on the First Section of the Tokyo Stock Exchange in May 1962, the company changed its name to Nikko Co., Ltd. in February 1968.

In April 1994, the machinery department of Nikko Co., Ltd.'s Industrial Machinery Division spun off its manufacturing and sales section, which dealt in general-purpose products such as shovels, scoops, farming tools, and small mixers, into Tombo Industry Co., Ltd. (100% owned by Nikko Co., Ltd.).

History of logo design

Over the years, many counterfeit products have been launched all over the world. Every time we saw them, we proved the quality of our products in various regions. In celebration of our 100th anniversary in 2019, we made the decision to renew our logo, making it more appealing and distinguishing our products from counterfeit ones.

JIS certification

In 2019, one of the subcontractors for Fukusaki Factory in Kanzaki District, Hyogo Prefecture, obtained JIS certification for their factory located in China. Japanese JQA staff visited the site, conducting inspections of all processes, strength assessments, and storage conditions to certify the factory.

* JIS stands for Japanese Industrial Standards, which are Japan's national standards that define specifications and measurement methods for Japanese industrial products.

By the way... Why Tombo?

The dragonfly (tombo or akitsu in Japanese) has been a familiar symbol of Japan (also known as Akitsushima [dragonfly islands]) since ancient times. At the time of our founding, we registered the Tombo mark as a trademark, expressing our desire to support Japan. Even today, although our business has changed greatly, the Tombo mark is still used in logos and other places.
